

ALPL antibody

Product Information

Catalog No.:	FNab00347
Size:	100µg
Form:	liquid
Purification:	Immunogen affinity purified
Purity:	≥95% as determined by SDS-PAGE
Host:	Rabbit
Clonality:	polyclonal
Clone ID:	None
IsoType:	IgG
Storage:	PBS with 0.02% sodium azide and 50% glycerol pH 7.3, -20°C for 12 months(Avoid repeated freeze / thaw cycles.)

Background

There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney(tissue non-specific). The product of this gene is a membrane bound glycosylated enzyme that is not expressed in any particular tissue and is, therefore, referred to as the tissue-nonspecific form of the enzyme. ALPL(Alkaline phosphatase, tissue-nonspecific isozyme) is also named as AP-TNAP, TNSALP and belongs to the alkaline phosphatase family. It can exist as a homodimer with the molecular weight of 140 kDa(PMID:18724009). ALPL was synthesized as a 66-kDa endo-b-N-acetylglucos-aminidase H(Endo H)-sensitive form, and processed to an 80-kDa mature form, which is anchored to the plasma membrane via glycosylphosphatidylinositol(GPI)(PMID:10839996).This antibody can bind the four mentioned alkaline phosphatases.

Immunogen information

Immunogen:	alkaline phosphatase, liver/bone/kidney
Synonyms:	Alkaline phosphatase, tissue-nonspecific isozyme (AP-TNAP, TNS-ALP, TNSALP) Alkaline phosphatase liver/bone/kidney isozyme Phosphoamidase Phosphocreatine phosphatase ALPL
Observed MW:	60-80 kDa
Uniprot ID :	P05186

Application

Reactivity: Human, Mouse, Rat

Tested Application: ELISA, WB, IHC, FC

Recommended dilution: WB: 1:500-1:3000; IHC: 1:20-1:200
